THE SEVEN BIKOSMA QUALITY PRINCIPALS

- 1 **BIOKOSMA** uses fresh plant total extracts from controlled **ORGANIC** cultivation or wild growth guaranteeing highest biological activity.
- 2 **BIOKOSMA** uses exclusively plant oils, waxes and extracts; therefore no mineral oils or their derivatives are used.
- 3 **BIOKOSMA** never uses raw materials from dead animals such as Elastins and Collagens. Substances from life animals used include only propolis, beeswax, milk-powder and milk proteins.
- 4 **BIOKOSMA** does not use material of gene-manipulated basic components.
- 5 **BIOKOSMA** uses natural preservative systems such as vitamins, alcohol, glucose combinations and extracts etc.
- 6 **BIOKOSMA** products are adjusted to the most favourable pH value of the skin, thus preserving its natural acid protective coat. In this environment plant substances develop optimal effect.
- 7 **BIOKOSMA** never test on animals. All products are applied on the skin of volunteers to test their effectiveness and tolerance.
